**DETAILED ACTION**

***Response to Amendment***

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nolting et al (6,298,123) in view of Scott et al (5,891,938).

Consider claim 1-6, 8, 13-20. Nolting teaches a method for detecting a fraud event in a distributed telecommunications network (the network in fig(s). 4-5), wherein the distributed network (in fig(s). 4-5) inherently enables performance of at least two functions selected from a list comprising an access function, a transport function, an application function, a management function and a security function (col(s). 20, line(s) 41-60), by respective functional groups of elements and wherein each of the groups comprising at least one element capable of performing operations related to at least the function of the particular functional group and operative to create records (call detail record CDR, see fig(s). 4) on the operations the method comprising steps of obtaining records data related to at least one telecommunications session (col(s). 9, line(s) 19-29) and originating from one or more of the elements (see fig(s). 5-7) belonging to at least two the functional groups, analyzing the records data (col(s). 10, line(s) 10-27; col(s). 14, line(s) 32-67). Nolting does not teach analyzing the records data thus obtained to determine whether there is a lack of consistency between the records data respectively obtained from the at

least two functional groups and relating to the same at least one telecommunications session, and if the lack of consistency is determined, concluding that there is a fraud event.

Scott et al teach a method and system for obtaining two call record from two sources for the same call and comparing the two for accuracy. If the parameter values between the two call record are not the same the call is determined as being mis-routed, which implied as being either arbitrated or fraudulent (abstract; col. 1 lines 60-67).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the teachings of Scott et al into the teachings of Nolting for the purpose detecting fraudulent activity.

Consider claim 7. Col(s). 9, line(s) 19-29 of Nolting and col(s). 2, line 9 – col. 4 line 67 of Scott et al read on the limitations of this claim.

Consider claims 9-12. Col. 2, line 9 – col. 5 line 15 of Scott et al read on the limitations of these claims.

***Important Notice***

3. The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to ***Group Art Unit 2614***.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
